anything that is on your computer. They only have the ability to "serve" a page from our site and put items in your cart. ... MX5102 Battery Backup/Power Management unit (with attached 10" power cord) Three 4" lengths of RG-59 coaxial cable;

An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups. Losing power is stressful, so don't let your offline router and computer add to it.

The primary role of a power conditioner is to improve power quality through noise filtering and voltage regulation. In contrast, a UPS offers backup power during power loss and surge protection. Internally, a power conditioner uses transformers and filters to clean and regulate power, while a UPS uses a battery to provide power during outages.
