

High power home theater system

As you can see, having a dedicated 20A outlet to power this amplifier allowed it to produce 25% more power than when used on a shared outlet. In fact, the amplifier failed to meet its 600 watts/ch (2CH driven) spec when using a shared outlet but exceeded its spec when supplied with enough output power from the wall outlet to deliver it.

But the main advantage of the AVR-X2700H is support for 7 channels with a power rating of 125W (6 Ohm, 1 kHz, 0.7%, 2ch) or 95 W (8 ohm, 20 Hz - 20 kHz, 0.08% 2ch) and the ability to connect an optional subwoofer, which makes it work with the Klipsch 7.1 Home Theater System so cohesive.

The M-8x2 also features LED status indicators, so you can easily see when a component is powered on or off. In addition, the unit comes with a detachable 6-foot power cord and a 3-year warranty. Overall, the Furman M-8x2 is an excellent choice for anyone needing a high-quality power manager for their home theater system. Furman PL-8C

The best home theater systems offer powerful audio in relatively compact packages. For those of you in smaller apartments or with compact home theaters, check out the Sonos Immersive Set With Beam for all the power you need in a tiny footprint.
