The 2022 Ford F-150 Lightning is one of the most technologically advanced vehicles the automaker has ever made. The all-electric pickup truck has quite a few advanced features that will make life easier for owners, but one of the more standout ones is the F-150 Lightning's ability to power the average home for three days.

However, I would like to find a way to use my Lightning as a source of backup power, in case a prolonged grid outage drains my Powerwall batteries and the solar array isn't able to recharge them. I need the Lightning to function in the same way a power generator would. 7.2 kW from the truck's 240 volt outlet is plenty to run my entire house.
