Solar panel scams target homeowners interested in installing solar energy systems. They involve scammers making false promises or tricking you into paying for services you'll never receive. Recently, the FTC also issued an alert to warn consumers about solar power scams, such as free solar panels or exaggerated savings.

I just want to know if this is the right company to work for because I really like and am good at selling solar: It is 1099 and we sell ppa's (power purchase agreements) for solar panels. Which essentially means the customer pays for lower kw electrical rates through the power the solar panels create. And they get off the main pg&e power supply.

One way to take advantage of solar energy without installing solar panels on your home is to subscribe to a community solar farm. ... guaranteed amounts. However, rebates and referral bonuses are common and legitimate ways solar installers and other companies may lower your system's cost. Use a trusted, vetted resource: ...

The demand for solar energy is skyrocketing across the nation. This is great news! However, as the solar industry grows and more companies compete for your business, you might notice an uptick in misleading solar advertisements or sales practices -- or even outright scams. (Don't get us wrong, plenty of solar ads are fine and the solar industry has many reputable providers.
