

Is sunlight a renewable resource

Renewable Resources: A renewable resource is one that would be hard to use up entirely because it keeps replenishing itself. For example, wood is a renewable resource because you can keep planting more trees, and it doesn't take long for them to grow.

Answer and Explanation: 1. Become a Study member to unlock this answer! Create your account. View this answer. Sunlight is a renewable resource. Perhaps the most well known renewable resource is the sun. No matter how much sunlight you use there will always be... See full answer below.
