

Jayco lithium battery upgrade

Because of the supply chain issues and the relatively high cost of two new AGMs, we recommended our friend upgrade his RV batteries to lithium. They only cost slightly more, which was worth it for the extra benefits. And we told him we'd do the installation.

Hi all, I'm struggling to figure out my charging system on my 2020 Jayco 28BHS. I attempted to upgrade to Lithium batteries for more amp hours and weight savings just before a long camping roadtrip... leaving in 2 days and I'm running into a charging issue. Background: * I bought two group 24 Lithium batteries for "drop in replacement";.

There's been a few threads on this recently; however, the short of it is you can switch them out and there's no issue except that your non-lithium capable converter will take longer to charge them past 80% as the lithium charge profile is very different from an SLA charge profile, so the converter thinks that the battery is charged much sooner, and will go into an ...

For higher performance, efficiency, and better longevity, you'll be sure to get bang for your buck with Lithium batteries. Lithium batteries come standard in our Jayco Silverline ...

Changing Jayco to Lithium Batteries. We have a Jayco Silverline 2016 and would like to change to Lithium batteries. The van is fitted with a Setec system which in itself is not compatible. I'd like to run a few ideas past the knowledgeable folk. 1. When connected to 240V power, this helps charge the batteries.

Install the battery without switching to Li and see if it works like pconroy said. Discharge the battery 25 or 30 % and see if it charges on La and then switch to Li. The only difference is the Li setting will charge the battery the last 20 % or so because of the higher voltage required for the lithium battery

Jayco RV Owners Forum & Trailers, 5th Wheels, and Motorhomes & Jayco Fifth Wheels: battery upgrade Click Here to Login: Register: Registry FAQ: Community ... battery upgrade. Quote: ... That said I would rather have 200 amps of lithium batteries and it would cost about the same and weigh around 61 pounds. _____ 2017 Eagle 291RSTS ...

I am planning to only upgrade to a single 460ah battery and changing out the BIM to lithium at this Upgrade to Lithium Question - Jayco RV Owners Forum Journey with Confidence RV GPS App RV Trip Planner RV LIFE Campground Reviews RV Maintenance Take a Speed Test Free 7 Day Trial ×

I recently changed from a Lead Acid Battery to a Lithium Battery. It is a Lithium Blue (made by Discover Battery in Canada) 100Ah 12 volt with full blue tooth electronics connectivity. For anyone not familiar with Discover Battery, this Lithium Blue is quite high-end and very expensive.

Jayco lithium battery upgrade

upgrade Click Here to Login: Register: Registry FAQ: Community ... I do believe you can still use any converter but you won't get a full charge on lithium battery. _____ 2022 jayco eagle 321rsts 2024 RAM 3500 Laramie Cc DRW B& W OEM 25K hitch ...

Lithium technology has its own set of issues, operation below 32 F being only one of them. One can easily ruin coach batteries of any technology if not maintained or used correctly. I prefer to use two 6V FLAs, primarily because it is much harder to deplete 6V of acid to the point it harms the battery. 12V acid level must be checked much more ...

However, the float stage is not high enough to maintain lithium for extended periods. But, since this RV is also a motorhome, the house batteries charge at 14.4 volts whenever the motorhome engine is running. And, since this RV has a solar charge controller rated for lithium batteries, it also keeps the batteries topped up nicely.

Jayco's 2021 range of caravans now have the option include a Lithium Battery, which have a higher energy density and voltage capacity, lower self-discharge rate than other rechargeable batteries and are light in weight. This feature allows you to take your off-grid camping to the next level. ... The Lithium Battery is available across the ...
