

# Largest solar installers in the us

Solar panels on a rooftop in New York City Community solar farm in the town of Wheatland, Wisconsin [1]. Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2023, utility-scale solar power generated 164.5 terawatt-hours (TWh), or 3.9% of electricity in the United States.

A solar installer will also be able to design your solar system to best fit your goals and habits by identifying the most productive locations on your roof and angling panels to collect the most sun.

Solar power is more affordable, accessible and widely used in the United States today than it was ever before. The progress and potential of solar power development in the country is staggering. Solar power capacity of the US has grown from approximately 0.34 GW in 2008 to approximately 97.2 GW in 2021.
