Lithium: Lithium batteries work even better than alkalines. They last much longer, have an epic shelf life, don't discharge as much power when not in use and can cope with extreme temperatures. While normal alkaline AAs struggle below 0°C, lithium batteries will operate down to -40°C.

AA rechargeable lithium batteries, in particular, have become increasingly popular among consumers due to their many benefits. Advantages of AA Rechargeable Lithium Batteries. Compared to traditional rechargeable batteries, AA rechargeable lithium batteries offer several advantages, including:

I purchased the pair of AA Energizer advanced lithium batteries for my needs. Both checked 1.71 DC volts well over the average rating. I have had the same model older AA lithium in my small home weather station for six years. They checked 1.56 DC volts that's better than the normal alkaline are new.

Although rechargeable batteries may be more of a popular option, as they offer better value over their lifespan and are better for the environment, a disposable set of alkaline AA or AAA batteries is incredibly convenient.
