Solar lithium iron phosphate batteries - also called solar LiFePO₄ batteries - are currently the best lithium batteries for solar systems. Their particular chemistry makes them the most cost-effective option for homes and businesses. They're also safer and less toxic than alternative solar battery types.

Lithium batteries are great when it comes to handling inconsistent discharge cycles. Whether your lithium battery bank functions as a backup power supply or your main source of power, it can handle inconsistency in discharging without causing damage to the batteries.

We offer expert advice to help you choose the most suitable lithium battery for your specific solar system needs and budget. We partner with leading international and regional solar battery ...
