The RB100-HP is the first lithium battery to be evaluated and approved for use with select Mercury Marine® outboard engines. Temperature Tolerant Lithium batteries can handle a wide variety of conditions and are even 2.5x more efficient at low temperatures than lead-acid while being able to safely operate up to 149°F (65°C).

Mercury Marine issued a service bulletin in May 2021 addressing the use of lithium cranking batteries with Mercury motors. Capt JamesC: 05-22-2024 06:01 AM: Quote: Originally Posted by friz (Post 17013676) ... Power from both motors can then be used to charge a lithium battery(s) or to power electrical components. ...

Generally inside of a lithium battery there are multiple cells that make up the total voltage. So say in a 12 volt battery like a Dakota Lithium 12V 60Ah battery, you have 4 cells that are each 3.2 volts, to make a total of 12.8 volts for your battery. That's why you often see 12.8 or 13.2 or something of that nature on your graphs instead of ...
