

# Minecraft solar system sky

Solar System Sky Version: The solar system version contains the known celestial bodies in the solar system. The Earth replaces the sun with one complete revolution of Earth equaling one Minecraft day. The orbital period of every planet is scaled to match the real-life solar system time in Minecraft days. Planet sizes are not scaled.

Solar system adds 85 new dimensions and 186 new biomes corresponding to planets, moons, and dwarf planets. These new dimensions can be accessed through either using commands or through building the new space portal. The goal of solar system is to both entertain, and, hopefully, teach players new things about the solar system they didn't know.
