

Minnesota renewable energy society

Minnesota Renewable Energy Society (MRES) has taken advantage of both of these programs and combined them! In 2015, MRES applied for and received a grant from the RDF to build two community solar projects, one in a rural area and one in an urban area. The goal was to compare the interest of urban customers and rural customers in subscribing to ...

In 2001, the Minnesota Legislature first enacted the Minnesota Renewable Energy Objective contained in Minnesota Statute section 216B.1691. As originally enacted, the Minnesota Renewable Energy Objective Statute required electric utilities to "make a good faith effort" to obtain 10 percent of their Minnesota retail

Smart legislation, like the 2007 Next Generation Energy Act, which established Minnesota's renewable energy goals, set Minnesota up for success. Our utilities have also led the way, with strong investments in clean power. Although our utilities are producing less carbon and more renewable energy, there is still

Minnesota renewable energy society

progress to make in our state.
