

Mothership dropping probes in our solar system

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed 'dandelion seeds' to explore the planets within.

Pentagon UFO chief says alien mothership in our solar system possible ... Wait for the other shoe to drop: Radar tracks will show shot down objects arrived from space. ... In 1960 renowned Australian physicist Ronald Bracewell speculated that alien societies may have already sent robot probes to our Solar System. He inspired sci-fi authors ...

A mysterious cigar-shaped object spotted tumbling through our solar system last year may have been an alien spacecraft sent to investigate Earth, astronomers from Harvard University have suggested.

"Whether we live in such a reality or not is not a philosophical question, we just have to look out," Loeb said. Loeb teamed up with the Pentagon office that investigates unidentified aerial phenomena, and they came up with a draft report that says it's possible alien ships have already visited our solar system.

The Pentagon's 'Alien Mothership in Solar System' Warning refers to a draft report and warning statement from the U.S. Pentagon and Harvard about the possibility of an 'alien mothership' UFO being present in the solar system that could reportedly send small probe spacecraft nicknamed 'dandelion seeds' to Earth in March 2023.

What would the "probes" be doing? The report states that "with proper design, these tiny probes would reach the Earth or other solar system planets for exploration, as the parent craft ...

It would be vital to know if they are lone probes or if they have a mothership. A mothership might allow specialization that wouldn't require humans for probe reproduction. It could also just be a spore that crop dusts probes as it passes through star system. Then the grow op begins. Too bad this is all tucked away behind a curtain.

In fact, Loeb thinks the first interstellar object spotted passing through our solar system in 2017 could have been an extraterrestrial mothership. That year, an unusual interstellar object was ...

The possibility of off-axis emitting probes opens a new avenue for the search for alien devices in our solar system. We intend to explore it further, observing the antisolar ...

According to the report, there is a possibility of an artificial interstellar object being a 'parent craft' or a mothership that sends small probes down to planets, similar to a mission conducted ...

Mothership dropping probes in our solar system

New research paper, in draft form, comes from the Pentagon's All-Domain Anomaly Resolution Office. Pentagon officials said in a draft document last week that aliens could be visiting our solar system and releasing smaller probes like missions conducted by NASA when studying other planets. A draft research report authored by Sean Kirkpatrick, the director of the ...

But the orbital behaviour of Oumuama and another meteor (IM2) inspired Loeb and Kirkpatrick to consider the possibility that an alien mothership could be in our solar system, and that it could be releasing many small probes to explore Earth and other planets. In the draft paper, the researchers say this could be similar to how NASA missions work.

Pentagon officials said in a draft document co-authored by a Harvard scientist, that a mothership could send mini probes to planets similar to missions conducted by NASA.

The Pentagon's "Alien Mothership in Solar System" Warning refers to a draft report and warning statement from the U.S. Pentagon and Harvard about the possibility of an "alien mothership" UFO being present in the solar system that ...

The paper is yet to be peer reviewed. Loeb is best known for flagging an unusual Near Earth Object with the Pan-STARRS telescopes back in October 2017. The interstellar object was named "Oumuamua and "unlike Solar system asteroids or comets, "Oumuamua appeared to have an extreme flat shape and was pushed away from the Sun "without showing a cometary ...

A mysterious object in our solar system could be an alien mothership sending smaller probes to monitor the Earth, according to a new draft report co-authored by the head of the Pentagon's UFO research office.

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed "dandelion seeds" to explore ...

Officials from the Pentagon have laid bare the possibility of an alien mothership visiting our solar system and directing probes to Earth, much like NASA have been doing when studying other planets.

He says the mothership could have released smaller ships - or probes - to study our solar system after spending a long time to get here. "With chemical rockets, it takes less than a billion ...

A Harvard scientist and a Pentagon official have authored a research article that suggests the possibility that there could be an alien mothership in our solar system, sending out probes to explore Earth and other ...

WASHINGTON DC - Could an alien mothership be hovering around the solar system, sending out tiny probes to explore planets? According to a Harvard scientist and a Pentagon official, it's possible. In a draft

Mothership dropping probes in our solar system

paper, the pair said it is feasible an extraterrestrial spaceship could be in our galactic neighborhood, exploring the region by the means

M. Kornmesser/NASA The official in charge of a secretive Pentagon effort to investigate unexplained aerial incursions has co-authored an academic paper that presents an out-of-this-world theory: Recent objects could actually be alien probes from a mothership sent to study Earth.

Pentagon Report Says Alien Mothership Could Be In Our Solar System And Might Be Sending Probes. ... The paper argues that the probes could easily be designed in a way that allows them to remain undetected by our current telescope technology. The Pentagon research paper, titled "Physical Constraints on Unidentified Aerial Phenomena," goes ...

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena research office noted in a report draft shared Tuesday. ... Pentagon UFO chief says alien mothership in our solar system possible. Summary by Ground News. There is a ...

In fact, the Pentagon has reason to believe an alien mothership is in our solar system, ready to explore Earth. Last week, officials stated that these supposed alien aircrafts could send small probes to our planet in order to study it, similar to how NASA does on missions. Sean Kirkpatrick, the director of the Pentagon's All-Domain Anomaly ...

Alien Mothership, Pentagon officials, and Harvard scientists suggest that an alien mothership could be watching us. Credit: Megan Rosenbloom / Flickr / CC BY-NC 2.0 The head of the Pentagon's UFO office and a Harvard scientist have presented a new idea about the possibility of an alien mothership being present in our solar system.. They proposed that small ...

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed "dandelion seeds"...

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and releasing smaller probes like missions conducted by NASA when studying other planets.. A ...

The leader of the Pentagon's UFO identification office, who recently speculated about the potential for an alien "mothership" in the solar system and "extraterrestrial technological probes ...

CINCINNATI (WKRC) - Pentagon officials released a draft document, saying that aliens could be visiting our solar system, and release small probes to study planets like Earth.

Three the speculation was that "outgassing" caused the acceleration but "Oumuamua doesn't seem to be

Mothership dropping probes in our solar system

outgassing like most other comets found within the solar system. Specifically, when comets from our solar system are heated by the Sun, outgassing typically leads to the ejection of visible material, which forms a hazy cloud around them ...

Pentagon officials have warned that an alien mothership in our solar system could be sending probes to Earth.. A recent report published by the US intelligence hub noted how "parent craft ...

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena research office noted in a report draft shared Tuesday.
