This LVX6048 is the latest member to MPP Solar's 120V/240V Split Phase inverter family. Adding several important features from our 220-240V European line, this inverter becomes the only low voltage model that offer these 7 valuable features. High PV input up to 450V, allowing more serial PV connection ...

MPPT's are most effective under these conditions: Winter, and/or cloudy or hazy days - when the extra power is needed the most. Cold weather - solar panels work better at cold temperatures, but without an MPPT you are losing most of that.

The problem then is the battery can potentially charge 4 ways: (1) shore power (direct from the MPP), (2) shore power (via the MPP's supply of 110AC to the RV's 110v distribution panel which includes a 110vAC to 12v DC converter), (3) solar power (via MPP's mppt) and (4) the car's alternator (via 7-way).

Ok, so after much searching and video, and even Will's book I'm still not sure how I should go about hooking an AIO 24v into my 30 amp RV distribution panel. I have two 100Ah Lifepo4 on order which I would make 24volt by wiring in series and am trying to cut costs and from my research a...

A 50A RV shore power is 2 120V legs. I have a 30A RV plug and it works fine with a 120V inverter. With the 50A, you basically have 240V between legs so you can not run both legs into the inverter input. You could use a second inverter or the other choice is only use one leg of a 50A RV cord and tape the other leg off or disconnect.
