It is among the most advanced and reliable emergency battery backup systems within its size class. It interfaces between a pump and its AC wall outlet. When AC utility power is present, the 1733 charges one or more batteries. While channeling power from the wall outlet to the pump it monitors the wall outlet for power outage detection.

To test the PowerSource 1800 backup power capabilities after installing the unit, unplug the AC power cord to simulate a power outage. Ensure the products connected to the PowerSource 1800 continue operating. You can test the surge capabilities of the PowerSource 1800 by turning connected products on and off while the unit is unplugged.

provide backup power out of the box. SUMPRO Model 75 Features Delivers up to 1800 watts of 120vAC electrical power Delivers up to 3600 watts of surge capacity Automatic Transfer to/from backup power Automatic Charger and Battery Monitoring System Expandable battery capacity for extended run times*

Edit: I hope the NOMA Back-up Power System, 1,800W also goes on sale like last year, it would be pretty handy since I often get extended power outages (24-48 hours) in the winter. Reply Jan 18th, 2007 1:11 pm

Gain critical hours to protect your temperature-sensitive supplies in outages or emergencies with a high-quality backup battery solution. The PowerHub 1800-400 provides twice the run time of the 1800-200 model, converting power from four 100 amp-hour deep cycle batteries to provide up to 1800 watts through the inverter for a high-output, primary power solution.

As power outages become increasingly common, the need for a reliable backup battery power system for

Noma backup power system 1800 battery replacement
