Congratulations on your purchase of the Orion StarShoot 5 MP Solar System camera (5 MP). The 5 MP is a high resolution color CMOS camera designed for Before the 5 MP can be used, software and camera drivers must be installed onto solar system ...

J'ai un Orion Starshoot Solar System Color Imager III... et la douloureuse impression de m'être fait arnaquer de 189 euros (qu'elle valait ; l'époque, si si !). C'est une des pires caméras du marché;. On ne peut même pas régler de gain, ce qui fait qu'elle est inutilisable sur les planètes, malgré son nom pourtant très évocateur.

The Orion StarShoot 3mp Solar System V imaging camera makes capturing lunar and planetary detail with your telescope fun and easy, thanks to the simple software and easy controls. Its 3mp resolution comes courtesy of the Micron MT9T001 1/2 inch format CMOS chip. 2040x1528 pixels and each of those pixels is a mere 3.2micronm in size for ...
