

# Oxford photovoltaics stock price

Oxford Photovoltaics Ltd, better known as Oxford PV, has achieved a final close of GBP 65 million (USD 82m/EUR 72.5m) for its Series D funding round, the UK perovskite solar firm announced today.

Oxford Photovoltaics has raised \$158.36M over 11 rounds. Oxford Photovoltaics's latest funding round was a Loan for \$16.16M on March 28, 2024. Valuations are submitted by companies, mined from state filings or news, provided by VentureSource, or based on a comparables valuation model.

Oxford Photovoltaics has 13 investors. European Investment Bank invested in Oxford Photovoltaics's Loan funding round. Silicor Materials, formerly Calisolar, produces solar silicon and high performance multicrystalline solar cells using a unique technology to reduce costs and improve efficiency.

2 days ago&#0183; Oxford Industries, Inc., an apparel company, designs, sources, markets, and distributes products of lifestyle and other brands worldwide. The company offers men's and women's sportswear and related products under the Tommy Bahama brand; and women's and girl's dresses and sportswear, scarves, bags ...

Next generation tandem solar panel achieves 25% efficiency, delivering significant breakthrough to accelerate the energy transition. Oxford PV, a pioneer in next-generation solar technology, has set a new record for the world's most efficient solar panel, marking a crucial milestone in the clean energy transition.

Oxford PV began working on its perovskite tandem solar modules in 2014. Earlier this year, the company set a new efficiency world record of 26.9% with its 60-cell residential-sized module ...

In depth view into OXM (Oxford Industries) stock including the latest price, news, dividend history, earnings information and financials. Oxford Industries Inc (OXM) 75.48 -0.90 ( -1.18% ) USD | NYSE | Oct 29, 16:00

Oxford Photovoltaics (Oxford PV) was founded in 2010 as a spin-out from the University of Oxford, to commercialize a new technology for thin-film solar cells. It was amongst the first in the world to recognize the potential of perovskites to act as a low-cost, highly efficient solar cell absorber material to convert sunlight into electricity. The Company focuses on ...

Oxford PV's vision is an all-electric world with perovskites as a mainstream solar technology. It is hoped the company's latest funding round will give it "the means to plan the next step, which is a gigafactory", says Averdung.

Oxford PV plans the commercial launch of its perovskite-on-silicon tandem cell this year, predicting a conversion efficiency of 27% and an energy yield of 24%, compared with a ...

Oxford PV, which in December 2020 hit a new world record cell efficiency of 29.52%, hopes to begin commercial production in early 2022. ... Module Price Index; PV Project Exchange; Archived: Solar ...

## Oxford photovoltaics stock price

Analyst Forecast. According to 4 analysts, the average rating for OXM stock is "Sell." The 12-month stock price forecast is \$80.67, which is an increase of 3.41% from the latest price.

The ground-breaking cell produced by Oxford PV has been independently proven to convert 29.52% of solar energy into electricity. In contrast, standard silicon cells used on millions of homes globally have an average conversion rate of just 15-20% and a practical maximum conversion rate of around 26%.
