

Pnm energy storage rfp

16 ("RFP") to ensure that resource adequacy metrics are met. 17 Roger Nagel - PNM witness Roger Nagel describes Aion Energy LLC's role in and support 18 of PNM's 2026 all-resource RFP, and provides details on the goals of the RFP, the process 19 involved in the RFP and the selection of resources, and the fairness of the RFP.

The New Mexico Public Regulation Commission (NMPRC) has approved an application from Public Service Company of New Mexico (PNM) to add 309.5MW of energy storage to the investor-owned utility's portfolio by ...

In PNM's 20-year plan for energy resources that was approved by state regulators earlier this year, the utility mapped out its aspirations for battery storage: 940 megawatts installed by 2027 and more than double that number by 2042. PNM has 13 battery storage projects expected to come online by 2026, and three of them will be owned by the utility.

PNM requested input from our customers and industry experts to help us prepare our PNM Integrated Resource Plan (IRP) for 2020-2040. ... November 19, 2019: Battery and Energy Storage; Sandia National Laboratory Guest Presentation ; January 14, 2020: Technology Review / Deadline for Scenario Requests ;

2022 Generation Resources RFP - This RFP is part of a solicitation process for the purpose of acquiring capacity resources to serve PNM's immediate forecast system needs ...

PNM requesting new resources for next years" energy supply demands (Albuquerque, NM) - PNM issued a formal request asking energy developers to submit resource proposals that could add up to 700 megawatts to the PNM system with guaranteed in-service dates by or before May 1, 2023 or May 1, 2024, respectively.

The New Mexico Public Regulation Commission has approved an application from PNM to add 309.5MW of energy storage to portfolio by summer 2026. Skip to content. Solar Media. ... The projects were selected by PNM ...

PNM submitted the application with the state regulator on 25 October last year, following a summer which saw the utility twice surpass its record peak electricity demand consecutively on 17 July and 18 July 2023. The NMPRC published an order on its online electronic docketing system approving the application on 31 May. Clenera solar and storage ...

Solar o More than 1,000 MW operating Solar in 35+ states/provinces o 2,500 MW in 10+ states in design, permitting and EPCM service stages Wind o Projects in 33 states and four provinces exceeding 30,000 MW of generation Fossil o Served as Owner's Engineer for over 15,000 MW of fossil generation in 2017 alone Energy Storage o Increasing activity in battery energy storage ...

Pnm energy storage rfp

August 28, 2023: PNM filed Reply Brief in appeal with the New Mexico Supreme Court (S-1-SC-39440) while motion for abeyance and remand remains pending August 18, 2023: Unopposed Joint Motion for Abeyance and Remand to Implement Settlement and Request for Expedited Order and Unopposed Comprehensive Settlement Agreed filed in appeal with the ...

PNM says it will welcome energy storage resources in its upcoming RFP, but did not give further details. Notices of intent to bid in the upcoming RFP are due Nov. 30, and proposals are due Jan. 30 ...

STORAGE AGREEMENTS AND) PROPOSAL FOR DEMAND RESPONSE) ... (PPAs) and energy storage agreements (ESAs), as required by the Final Order in Case No. 190019- 5-UT (concerning the replacement resources for the San Juan Generating Station). ... energy costs through PNM's Fuel and Purchase Power Cost Adjustment Clause and recovery of .

Future Energy Resources: Resource Planning Longer Term Resources. PNM conducts an Integrated Resource Plan (IRP) once every three years. The IRP identifies generation mixes that could supply energy needs over a 20-year period. The IRP is a public process that incorporates public meetings and inputs in the final plan.

As New Mexico works to transition to clean energy, the largest electric utility in the state issued a new request for proposals, or RFP. This RFP asks developers to propose projects that could help the Public Service Company of New Mexico meet increasing demands for energy. Nicholas Philips, PNM's director of integrated resource planning, spoke

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995 Statements made in this news release for PNM Resources, Inc. ("PNMR"), Public Service Company of New Mexico ("PNM ...

PNM Exhibit RWN-2 - Aion Energy RFP Support Experience PNM Exhibit RWN-3 - Aion Energy Scope of Services PNM Exhibit RWN-4 - PNM 2026-2028 Generation Resources RFP ... 17 experience spans renewable, energy storage, coal, petroleum coke, waste coal, 18 natural gas, liquified natural gas, landfill gas, biogas, biomass, and geothermal ...

2 OF COSTS PNM IS REQUESTING TO CERTIFICATE COMPARED TO 3 THE EPC CONTRACT? 4 A. Yes. PNM is requesting approval to certificate estimated costs consistent with the 5 Sandia storage cost presented in PNM Table JWH-2. This estimate is consistent 6 with the RFP submitted bid and RFP evaluation. However, the actual cost of the

HDR responded to PNM's RFP for Integrated Resource Plan Owners Engineer dated March 15, 2017, for the IRP Non SJGS Alternative RFP Project and was ... A supplemental RFP, the Energy Storage RFP, was issued in April of 2019 to obtain additional bids for utility-owned energy storage resources. The April 2019

The purpose of my testimony is to support PNM's proposal to include all Energy 20 Storage Agreements

Pnm energy storage rfp

("ESAs") costs in the Fuel and Purchased Power Cost ... PNM Figure JAM-2 - Battery Energy Storage Capacity (2023-2030) 2 . 3 Texas illustrates the exponential rise of battery storage. A September 2023 Texas 4

PNM is soliciting Proposals for capacity and energy resources that facilitate the replacement of a portion of PNM's current portfolio and to support other anticipated resource needs in the near future. Specifically, PNM is targeting the acquisition of 200 to 400 MW of firm capacity for its New Mexico portfolio.

An ESA between PNM and Route 66 Energy Storage LLC for the capacity and energy storage of the Route 66 Energy Storage Project over its contractual (approximately 20 year) term at a volumetric rate of \$48.95/MWh, a 49.5 MW four- ... PNM's RFP resulted in a range of bid proposals to meet 2026 reliability needs. PNM's

4 into three (3) Energy Storage Agreements ("ESA") totaling 250 MW of four-hour 5 energy storage, one (1) Purchased Power Agreement ("PPA") for 100 MW of solar 6 energy, and a Certificate of Public Convenience and Necessity ("CCN") to 7 construct a 60 MW, four-hour Battery Energy Storage System ("BESS"). All

The All-Source RFP seeks bids from qualified respondents to supply up to 2.3 million annual megawatt hours ("MWh") of Clean Energy Transformation Act ("CETA") eligible resources and up to ...

The Public Service Company of New Mexico (PNM) has issued two all-source Requests For Proposals (RFPs) to support expected economic growth in the state, and to replace the planned Rockmont solar ...

1.3 RESOURCES SOUGHT THROUGH THIS RFP PNM is soliciting proposals for capacity and energy resources that facilitate the replacement of a portion of PNM's current portfolio and to support other anticipated resource needs in the near future. Specifically, PNM is targeting the acquisition of 150 MW of accredited

market conditions for battery storage systems. PNM pursued a Engineer Procure Constructn ion Management approach to acquiring the services and equipment necessary to own and operate the BESS Project. PNM issued a request for proposals ("RFP") and received bids from three companies for a variety of energy storage system options.

PNM is soliciting Proposals for capacity and energy resources that support PNM's resource needs by June 2023 and that facilitate the system capacity required to support forecast Economic Development load growth within PNM's system. Specifically, PNM is targeting the acquisition of up to 500 MW of firm capacity for its New Mexico portfolio.

In the two RFPs, PNM is seeking competitive proposals for all forms of energy, capacity, storage resources, demand resource, and technologies that can meet the increasing electric demand. These all source RFPs provide the widest range of options for meeting energy needs. Proposals must value New Mexico's experienced

Pnm energy storage rfp

Since PNM filed its initial application on October 25, 2023, the Independent 11 Evaluator has concluded final review of PNM's RFP process and the resource 12 selection in PNM's proposed portfolio for resources in 2026. The Independent 13 Evaluator's Final Report was made available to PNM on December 6, 2023. My

PNM Request for Proposals Smart Appliances and Energy Storage are among technologies that PNM will consider in its request for proposal. PNM is issuing a request for proposal (RFP) for technologies and implementation services that can adjust, store and or dispatch electricity during high use times such as extreme heat.
