Solar panels can typically still be used to charge power banks that don't have solar inputs, but you may need to get a third-party adapter to go from your panel to the USB. Q: What can be charged with a solar power bank?

When you're shopping, the terminology can be confusing. By "solar battery chargers," we mean lightweight, lower-wattage devices that can directly charge personal electronics while on the go, typically via USB port. "Portable solar panels" are their larger, heavier, and higher-power siblings.

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

Portable solar chargers are typically designed to fold for storage, making them easy to keep around in a bag, seat-back pocket or emergency kit while still providing a large enough surface area to capture sufficient solar energy to produce electricity. This all means a portable solar charger is an extremely valuable addition to your emergency kit.
