WebAssign for Glover/Overbye/Sarma's Power System Analysis and Design, 7th Edition is a flexible and fully customizable online instructional solution that puts powerful tools in the hands of instructors, enabling you to deploy assignments, instantly assess individual student and class performance and help your students master the course concepts.

New learning objectives and helpful case study summaries help focus your learning, while the updated PowerWorld Simulation works seamlessly with this edition's content to provide hands-on design experience. WebAssign for Glover/Overbye/Sarma's Power System Analysis and Design, SI, 7th Edition, helps you prepare for class with confidence.

A Ph.D. from MIT, J. Duncan Glover is President and Principal Engineer at Failure Electrical, LLC. He was a Principal Engineer at Exponent Failure ...

Abstract-The modeling of a power system allows the analysis of the distribution of the power flows in the transmission lines, the variation of the tension in load type bars and load with generation. This article presents for the understanding of the above the result of the simulation of a bar system of the IEEE with 5 bars, two (2) generating ...

The new edition of Glover and Sarma's highly-respected text provides students with an introduction to the basic concepts of power systems along with tools to aid them in applying these skills to real world situations. Like earlier editions of the book, physical concepts are highlighted while also giving necessary attention to mathematical techniques.

WebAssign for Glover/Overbye/Sarma's Power System Analysis and Design, 7th Edition, helps you prepare for class with confidence. Its online learning platform for your math, statistics, science and engineering courses helps you practice and absorb what you learn. Sold by Half-Price Hank's Books and ships from Amazon Fulfillment.
