

Three phase properties may require a 3-phase solar system. With a three phase solar system there may be instances when you will import energy on one phase while exporting energy on another phase. This is because all three phases operate independently of one another, you can think of them like three separate energy systems.

Designed, developed and made in New Zealand this doesn't only makes off-grid installations cheaper and faster, this opens a door for complete new applications of solar power. The "Plug´n´Free" system brings power everywhere you find a sun exposed flat surface. It is built rock solid and solves all problems of components integration.

One or more Bi-directional Inverters (5 kW or 10 kW) deliver AC power to the site and charge the batteries from the generator, solar or other renewables.; Lithium-ion (LiFePO 4) batteries store 3.5 kW of energy per module. Active cell balance and system management control battery performance and safety. The battery charger charges the batteries from mains power or ...

Vortex Power Systems was founded on the vision of making power from atmospheric vortices a reality. ... With a conviction for developing New Zealand and the World's clean energy infrastructure, he is great fit in the team. Billy drives our commercial pathway forward and spends his down time as a Multisport Expeditionist.

Our new ULTRA off grid solar systems using the latest technology are made in New Zealand and priced from \$15,995 inc GST. The base system sizes below are a guideline only. Additional panels and battery modules can be added to each base system depending on your daily loads and the sunshine hours for your region.
