Power Systems Testing Company can provide qualified technicians utilizing the proper personal protective equipment (PPE) per the NFPA 70E standards and the latest technology in Infrared Cameras. The primary benefits of infrared thermography are that tests can be performed quickly and without destruction to equipment.

The distribution system is a solidly grounded wye system. The nominal voltage to ground is greater than 150 volts and less than or equal to 600 volts line to line. The disconnecting means is rated 1,000 amperes or more.

ELECTRICAL MAINTENANCE TESTING; POWER SYSTEM ELECTRICAL STUDIES; GROUND FAULT SYSTEM TESTING; Electrical Field Services. Field Service Our expert staff performs the following field services: Automatic Switches. Battery Systems. High & Low Voltage Circuit Breakers & Switches. Ground Fault Systems.
