# Power to go security system

protection for your property against ...

AC power is provided to a security system through a plug-in transformer. You must run a wire between the transformer and the alarm panel to transmit power. This is a big step in setting up a system. An alarm system will also have a backup battery to provide power during electrical outages.. AC power represents the primary power source for an alarm system.

The impacts of an extended outage go far beyond the power system or the value of the lost energy purchase itself. Electricity's share of final energy consumption is set to grow. Having increased from 15% in 2000 to 20% today, it is set to grow to 24% by 2040 if countries stay on their present course as in the Stated Policies Scenario of the ...
