A powerful battery keeps your scooter going. Battery performance defines the Go Go &#174; Endurance Li Mobility Scooter. With lithium technology, you'll charge your batteries faster, achieve longer battery life, and experience greater reliability from one of Pride's most popular mobility scooter lineups.

The batteries in your Pride Mobility scooter literally move you forward. Without them, your scooter is merely a chair with wheels. These batteries don't get much attention -- until now. We're going to lift the shroud to give the battery its time in the spotlight.

With lithium technology, you'll charge your batteries faster, achieve longer battery life, and experience greater reliability from one of Pride's most popular mobility scooter lineups. Lithium batteries, the same technology used to power your smartphone and electric vehicles, pack more power into smaller, lighter units.

Mobility scooter battery types There are four types of mobility scooter batteries: Regardless of type, all mobility scooter batteries are 12Volt. As a rule, your scooter needs two 12V batteries for a 24Volt output.
