Prime solar power

Solar energy is a renewable source of energy that harnesses the power of the sun to produce electricity. Solar panels absorb sunlight and convert it into direct current (DC) electricity. The inverter then converts DC electricity into alternating current (AC) electricity, which can be used to power your home or business.

Prior to founding Prime Solar Power, Robert led technical departments at several top Wall Street firms where he designed and operated communication networks that delivered 99.99% reliability. Robert is a graduate of Columbia University where he earned a Bachelor of Science in Mechanical Engineering.
