

Purchase used solar panels

There are two options for buying second-hand solar panels: used or refurbished products. As you now know, used solar panels were previously owned by a consumer or business. Refurbished solar panels are used solar panels that have been restored to an acceptable condition or standard by a refurbishing company or the manufacturer.

A used solar panel is any panel that was previously owned by a person or business, usually a utility company. A solar panel that was purchased, taken out of the box, and never installed on a rooftop is still considered used. A solar panel described as "like new" is a barely used product and performs like a new solar panel.

Generally, second hand solar panels cost up to half as much as brand new models. If you're buying used panels from places like Gumtree, Bimble Solar, or SecondHand, you could get them for as little as \$50-\$70.
