It is widely accepted that consciousness or, more generally, mental activity is in some way correlated to the behavior of the material brain. Since quantum theory is the most fundamental theory of matter that is currently available, it is a legitimate question to ask whether quantum theory can help us to understand consciousness.

A paper published in Entropy offers their novel theory on the links between quantum mechanics and consciousness and details a series of experiments to test it. Some of those experiments--like linking a human brain to a quantum processor--are currently impossible.

For example, in the 'Quantum Mind Power with The Morry Method' system that we created, various 'sculpted' tones and embedded frequencies are used in order to get the brain to go into altered (but very natural) states of consciousness. When the brain reacts to these tones and goes into these altered

NOTE: Some people have problem downloading the file, so I added both a online version and a downloadable version. To experience the maximum effects, I highly recommend you download it to your own PC. Listen to the online version only if you can't download it.
