Marine renewable energy (MRE) devices generate electricity from the ocean's waves, tides, and currents. As we install these devices in the ocean to provide clean energy and help combat climate change, it is possible that they could affect the marine environment. However, scientists and engineers are making sure animals and their habitats will not be harmed.

Renewable & Nonrenewable Energy Resources: Energy is necessary to carry on with life; from fueling giant airplanes to fuel up your tiny car or from powering massive machines to charge up your pocket-fit smartphone, almost everything needs the energy to carry its job. And we have got much energy resources to do so, some of them are renewable, and some are here ...

Natural coloring is a term used to describe the use of natural substances to color hair, skin, and fabrics. HENNA is a natural dye made from the leaves of the HENNA plant, which is native to tropical and subtropical regions of Africa, Asia, and Australia. It has been used for centuries to dye skin, hair, and fabrics, and is still popular today.

by Kevin Stark There are two major categories of energy: renewable and non-renewable. Non-renewable energy resources are available in limited supplies, usually because they take a long time to replenish. The advantage of these non-renewable resources is that power plants that use them are able to produce more power on demand. The non-renewable energy ...
