

Renewable energy etf reddit

The index (S& P 500 Global Clean Energy) selects only pure renewable energy companies, which isn't true about all the clean-energy ETFs; it excludes companies who dabble in other things like natural gas or automobiles (so no TSLA or NIO). The index caps weights to 4% and has a high market cap threshold.

The ETF has been designed to provide investors with exposure to the performance of an index, selected at the discretion of BlackRock, that is composed of companies that are involved in the clean energy sector or generate clean energy. The current index for the ETF is the S& P Global Clean Energy Index.

Experience the essence of sustainability with ETFs committed to renewable energy, view below a list of the top clean energy ETFs. A blend of transformative return promise and environmental consciousness.

I had the same idea, decided to have some fun with ICLN based on it with Green/Renewable Energy. So far its not disappointing to me. I would definitely hold on to it and not sell right ...
