

# Ryobi lithium 18v battery defective

I've got an 18v HP 4ah battery (PBP004) that is showing as defective on the charger. I've tried some techniques to "jump start" it but haven't made any progress. I'm getting readings on the multimeter that seem to be inconsistent with what I believe I should expect to see. The battery was gifted to me new within the past 3 years.

PBP005 Ryobi 18V Lithium Battery Rebuild Service. Our skilled technicians will replace all of the cells in your battery. ... Note: When we are rebuilding your battery, if your circuit board is found to be defective, we will contact you. Before you begin the repair process, it's important to verify that your Ryobi 18V battery is indeed dead. Here are some common signs that indicate a dead or non-functioning battery: No power output: When you insert the battery into your Ryobi power tool, there is no power or the tool does not turn on.

Before buying Ryobi lithium batteries recently, I had been running my older 18V cordless tools with empty battery shells, and 6S LiPo packs Velcro'd to them. I hoped that buying proper lithium packs would take care of keeping this simple. I don't really want to eventually need external balance leads coming out of a pack :)

One of the most common issues that you have to face on lithium batteries is batteries being deformed and swelling due to overcharging. That is not only a problem with the Ryobi 18-volt batteries but with any lithium batteries that you can possibly get your hands on.

If you have determined that the charger is working and the red LED pulses slowly, your battery has a problem. More than likely, one of the cells in the battery is defective. The battery cells are not replaceable, and you should recycle the battery properly. Do not attempt to repair the battery. Lithium batteries can explode if not handled properly.

Pair this Lithium HIGH PERFORMANCE battery with any 18V ONE+ HP tool to leverage high performance brushless motors and advanced electronics for more power, longer runtime and the overall best experience on the 18V ONE+ system. Part of the RYOBI ONE+ System - Any 18V ONE+ Battery Works With Any 18V ONE+ Product.

Pair this Lithium-ion HIGH PERFORMANCE battery with any 18V ONE+ HP tool to leverage high performance brushless motors and advanced electronics for more power, longer runtime and the overall best experience on the 18V ONE+ system. This 18V ONE+ 4Ah Lithium-ion HIGH PERFORMANCE Battery is backed by the RYOBI 3-Year Manufacturer's Warranty and ...

This guide applies to Ryobi One+18V Li-ion Battery (130501002), but should also have more general application. This guide will show you how to disassemble the battery pack and check ...

The high visibility LED fuel gauge clearly indicates remaining runtime. Pair this Lithium HIGH PERFORMANCE battery with any 18V ONE+ HP tool for more power, longer runtime and the overall best experience on the 18V ONE+ ...

When it comes to eco-friendly disposal, the first step is to check if your local recycling center accepts lithium-ion batteries. These facilities have the resources to handle and recycle ...

The high visibility LED fuel gauge clearly indicates remaining runtime. Pair this Lithium HIGH PERFORMANCE battery with any 18V ONE+ HP tool for more power, longer runtime and the overall best experience on the 18V ONE+ system. Part of the RYOBI ONE+ System - Any 18V ONE+ Battery Works With Any 18V ONE+ Product.

That is not only a problem with the Ryobi 18-volt batteries but with any lithium batteries that you can possibly get your hands on. With that in the perspective, you will need to be careful about taking good care of the batteries since there could be a wide range of problems if you are using any such battery that might have been swollen.

If your Ryobi battery is dead, check the charging temperature, clean the terminals, and check if it's in sleep mode. If so, use "mini-charges" - slot the battery into the charger for a few secs, remove before the lights flash. Repeat up to 30 min until it has enough charge to "revive" itself. Ready to fix this Ryobi battery? Then let's dive in!

Though Ryobi's batteries work like a charm in most cases, it's not uncommon for one in seemingly fine shape with a full charge to not work as intended. If you find yourself in that frustrating situation, there are a few things you can do to try getting the battery on the same page as your tools.

I have an 18v 4Ah battery (RB18L40) which I use in an impact driver (R18IDBL). Today I went to check the battery level by pushing the battery indicator button and then all 4 lights started flashing continuously (picture and video). The battery doesn't work in the impact driver anymore and I can't get the lights to stop flashing.
