Solar inverters are essential components of PV systems. They convert the direct current (DC) generated by PV modules into alternating current (AC). SMA PV inverters are compatible with ...

Hybrid inverters combine solar inverters and battery inverters in one device. This means that they not only convert direct current into alternating current, but also make it possible to store excess solar power in a battery.

Established in Germany in 1981, SMA was creating solar equipment at a time when most people still hadn't even heard of the concept of turning the sun's rays into usable electricity. SMA's string inverters, including the Sunny Boy, have been among the best products in the industry ever since.
