Scam no miner solarx.ai,but paid for one wallet theft . Scam. They will not refund my purchase for a miner. I now believe they repete and renew the scam setting up new similar addresses after the collapse of the last because people do not get back their investment, they have taken money wrongly from a wallet link up.. Date of experience: June 09, 2024

Great company to intern at. I was a final year polytechnic intern and had a great experience working for Solar AI. Gérld was my boss and guided me along the way while teaching me the the trades of the industry. I was given opportunities to work on projects that would impact the company, while allowing me to learn and grow personally.

Solar AI initially kicked things off as a data science company, primarily to aggregate roof data across Singapore and complement ENGIE's solar implementation efforts. This database was used to create a premium "Google-style" service tailored for ...

Solar is already a great choice to help you achieve energy independence. AI promises to make the installation process even better. Experts say AI will make residential solar installations cheaper, easier and faster. There's hardly an industry that artificial intelligence hasn't touched by this point -- and residential solar is no exception.

There's hardly an industry that artificial intelligence hasn't touched by this point -- and residential solar is no exception. That's good news for solar customers: AI promises to make solar installations faster and potentially cheaper, while also improving the performance of a home energy system over time.

Yuma incentives and rebates. Solar incentives and rebates can cut the cost of installing solar in Yuma by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some cities, counties, states and utility companies offer additional solar incentives, saving ...
