# Solar canopy company

maintain. We are one of the few companies who offer both solar power systems and canopy structures.

The company's solar canopies can be the answer when a roof is disadvantageous to meeting energy demands, and the timber framing elevates the aesthetics of a conventional ground-mounted system. (The first iteration of the framing kit ...

Solar carports, also known as solar canopies, are mounted structures with solar panels built into the roof. They are usually found in parking areas and allow facility owners to monetize these lots while providing shade for cars. Installing this technology will generate clean and renewable power onsite and offset your facility's electric usage.

Thanks to big drops in the price of solar panels and generous incentives like the solar tax credit, solar canopies offer home and business owners substantial energy savings. Solar parking canopies - otherwise known as solar carports or solar parking lots - are the most common type of solar canopy structure.

PARASOL specializes in transforming parking lots into beautiful solar power plants, recognized for best in class architecture. Parasol is a full-service design & build company nationwide, strategically positioned to bring finance to select ...
