They're good at dealing with shade (like power optimizers), and have the additional advantage of making your solar system easy to expand. They are, however, the most expensive type of inverter. Learn more: Inverter types compared

The inverter has excellent efficiency and performs above 97%. It is easy to install and has a clear touch screen where you can programme and read the system status. Added to the inverter is a Wi-Fi port to allow the user to monitor the inverter via the internet. o Maximum efficiency of 97.5% with wide input range

Our inverter models include popular brands such as Voltronic, Infinisolar, Axpert, Sunsynk and much more. We also sell inverter accessories such as Canadian Solar Panels, Narada Lithium Batteries, power trolleys, cables and connectors as well as repairs. Over the years batteries have been the main source of storing power.

There are three different kinds of solar inverter that you can use with your solar panels. As is the case with any sensible industry, you get what you pay for. A string inverter (or centralized inverter) is the cheapest of the three options. It functions as a lone operator, processing the DC electricity of all your solar panels.
