A solar power system in Malaysia, or anywhere else, cannot run without an inverter. Typically, a standard solar inverter will be installed for each string or array of solar panels. However, efficiency problems -- especially if the other panels are unable to absorb enough solar energy due to shading or debris -- can easily occur with string solar inverters.

Samlex power inverters are some of the best-loved pure sine wave inverters on the market, and the same goes for their PST-600-12. This model has two GFCI-protected AC output sockets, and comes with both battery clamps and a cigarette lighter plug-in wire, giving you a few choices for input (especially handy for use when driving - say for your RV or trailer).
