We are very happy with our experience of having Harrison's install a solar system in our wee over 60's unit. Cameron was awesome to work with, full of knowledge, that he was happy to share, and always prompt for

Solar power christchurch

appointments. Our 7 panel system works great and our usual power bills of around \$140 p/m have reduced to around \$60 p/m. I must also give thanks to the on-site work ...

Our top pick for grid-tied solar system inverters. Christchurch Solar is proud to partner with Fronius to provide reliable and effective solutions for our customers. The inverter is one of the most vital parts of your solar system. It works very hard for a long time, converting the sunlight that hits your solar panels into usable electricity.

Founded in 2008, our company is a leading specialist in solar energy solutions, catering to both residential and commercial sectors. With a strong focus on sustainability and a commitment to harnessing the power of the sun, we specialise in three key areas: solar photovoltaic (PV) systems, solar water heating, and solar pool heating.

How much power is produced for a typical solar system? In Wanaka, assuming normal amounts of sunshine, a 4.34kW solar PV system (14 x 310W panels) would produce around 5,730 kWh p/a. A house on average uses about 7,000 kWh of electricity according to Electricity New Zealand.

High quality solar energy systems installed by experts. Whether you are looking to improve your businesses sustainability credentials, add value to your house, reduce your carbon footprint, or simply take control of your energy bills, CPS Solar Christchurch will design and install the best system for you, customised to meet your needs.
