With its durable enclosure and ergonomic design, the GB2000 is our top pick for a solar generator you can take anywhere. The 2,106 watt-capacity lithium-ion battery packs plenty of power into relatively compact housing, and the so-called "parallel ports" make it possible to combine two power stations, doubling the total power output.

Probably not, unless you get a large solar generator and you have a tiny home. Solar generators are meant to power and charge just a few electronics, not the entire house. If you want to backup your entire house, go with a wired system complete with solar panels on the roof and a high-capacity battery bank.

Various generators charged other generators to test maximum inverter loads. 15-amp and 20-amp circuits with GFCI were used for AC charging generators when solar conditions were unfavorable or to ...
