

The Solar Power in Sydney is moving towards Battery Storage as battery storage is the new buzzword in the renewable energy world. Solar PV systems generate maximum electricity in the daytime in summers, but it is used in the evening when the sun sets. The ability to store that electricity for later use helps us to reduce or eliminate electricity bills.

Grid-connected residential solar panels Sydney, NSW is the most common type of residential solar power installation in Australia. The inverter converts DC electricity generated by these installations - which originate from photovoltaic panels - into AC current so it can be used around your home or business.
