Find all the best free Apple Watch faces, including useful options like Modular, fun options like Snoopy, and cool faces like Solar Dial and Astronomy. ... or the entire solar system. It's a beautiful watch face that's great for amateur astronomers since it can show the planets' relative position and the moon's current phase. If you ...

I give the Apple Watch Solar Dial a lot of credit for taking the properties of the smartwatch and using them to create a very captivating experience. The luminosity of the display and its ability, as night falls or sunrise dawns, to display different colors, as well as the general composition of the dial, makes for something much richer and far ...

The Solar watch face, introduced in WatchOS 6, is a new type of watch face. It is called the Solar Dial, and it is a remarkably charming thing. It has been described as a miniature sundial for the wrist, but it is rather more like having a sundial and the Sun itself on your wrist, both at the same time.

watchOS 9 features Moon calendar watch face. This fall, watchOS 9 will bring some fabulous space-themed watch faces to your wrist. Some of these watch faces complement iOS 16's wallpapers perfectly, but Apple also added ...

With the current watch face showing, touch and hold the display. Swipe to the face you don't want, swipe it up, then tap Remove. Or, on your iPhone, go to the Apple Watch app, tap My Watch, then tap Edit in the My Faces area. Tap next to the watch faces you want to delete, then tap Remove. You can always add the watch face again later.
