

Sony handycam lithium battery

To charge the battery pack. Be sure to charge the battery pack before you start using this product. We recommend that you charge the battery pack in an ambient temperature range of 10 °C to 30 °C (50 °F to 86 °F) until the POWER/CHG (charge) lamp turns off. If you charge the battery pack outside of this temperature range, you may not be able to charge it efficiently.

(SEL) Please enable JavaScript to continue using this application. A compact and convenient V-series rechargeable battery. InfoLITHIUM(TM) technology offers a precise remaining power indicator when shooting with Handycam®, and enjoys improved stamina for fewer battery swaps. Supports quick charge with optional BC-QM1 or AC-VQV10 chargers.

The performance of the built-in battery decreases depending on the electrical discharge times, usage duration, usage environment, which will shorten the battery life. Once the available battery time when the battery is fully charged decreases to half of what it was at the beginning, the battery should be replaced.
