The common problem of "Protector Push Power" started on my Sony Home Theater DAV TZ210 a couple of days ago. The online suggestions of checking the speaker wires didn't fix the issue. Finally I cleaned the internal boards and reattached all the internal cables which seems to have partially fix the problem.

Home Theatre & Soundbars . Blu-ray Disc & DVD Players . Audio. Audio; Headphones PUSH POWER / PROTECT / PROTECTOR is flashing in the display of the home audio device. ... The power of the audio system or portable speakers turns off automatically after 15 minutes.

Customer: I have a display saying push power protector button on my Sony Bravia home theater system. What is this? I can't get sound on my wide screen. Technician's Assistant: How old is your Bravia? Customer: I guesstimate at least 10-12 years old Technician's Assistant: Does the TV menu work? Do you have the same problem on all sources/inputs?

I have recently bought a Sony DAV IS10 and have only been using it for half a day and I got the same error message "Push Power Protector". The manual asks you to check for ...

I have an Sony BDVE280 home cinema kit - had it 7 months. The PSU became faulty and causes the 5A mains fuse to blow. I took it to the dealer for repair. On return I'm getting the same "Protection - Push Power" message. This ...

When power returns at a higher voltage than the power rating of the receiver system, it is more likely to enter the protector mode. Short circuit: Short circuits occur when two different electrical cables or components form an abnormal connection, even though these components or cables are meant to have different voltages.
