

## Spartan camera solar panel

The 15W will charge faster. You do not need the battery box and battery if the camera isn't in a busy location like a feeder. The camera will work with just the solar panel as long as the panel can keep up with the workload.

Get in touch with tech support and see what they suggest. When using a solar panel you need some sort of solar controller to limit the voltage to the camera. In full sun most 6v panels can put out up to 10 volts which is way too much for the 6v camera to handle. [Support@Spartancamera](mailto:Support@Spartancamera)

Up to 5% cash back! With your GoLive or Ghost's internal rechargeable battery and this easy solar panel connection, setting up and maintaining your camera is a breeze. Only to be used ...

It originally is included with the starter kit I purchased. After study, I worked out how to use this bracket with the parts sent with the solar panel. The tree anchor attachment sent with the camera is used and shown in the sales page of the bracket. I understand why Spartan is offering this alternative to hold the solar panel.

Get some extra green in your day, and make sure you always have power on your security camera system with the Spartan Camera 15W Solar Panel. With 15 watts of energy storage capacity, these Solar Chargers from Spartan Camera can provide some extra electricity to keep your system running in the field, even during those gloomy overcast days. We bought solar panels for our GoCam cameras and we need to upgrade and want to buy the GoLive cameras. Will our solar panels work with... Home Camera Management Community Old Forum ... Spartan Camera GoCam battery box 10W solar panel 10W solar panel bracket. 0. Comment actions Permalink.

if you use just the solar panel with the Golive2 and the internal battery gets to low to power the camera and turns off, will the solar panel recharge the battery when the sun comes out or will you...

The only camera designed for direct-connect solar panel is the GC-W4Gb (Ghost). Since you mention converting to 6V, that leads me to believe that your camera is NOT a W. I'm not familiar with the ins and outs of external power, but the typical solar setup for these cameras is a solar panel to keep an external battery charged and then the ...

Fit 10W 15" (small) Spartan Solar Panel ; Steel construction ; Use with Ghost power cable adapter to provide power to your Spartan Ghost trail camera (sold separately) Use with external Spartan battery box and 12V battery for GoCams (sold separately) Angle the panel to ...

I ordered a 10W mono solar module. Model number SC- SP-10. I have AA High capacity rechargeable batteries in the camera. Turned it on and it work just fine for a day was running on solar then it stopped taking pictures and sending pictures. I Ordered the solar panel from Spartan for the specific camera so I was assuming that it was the right one.

Spartan Solar Kit With Battery saves you time and money. The solar panel will keep your camera's internal

## Spartan camera solar panel

battery charged, allowing you to leave the camera for longer periods without needing to swap or exchange batteries. This will reduce your time spent at your trail camera site, ensuring that you are not disturbing n ...

There's no recommended solar panel, per se. If you're talking about the Ghost (GC-W4Gb or GC-G4Gb), then Spartan has a direct-connect solar panel (maybe not in stock right now). For all other (6V) models, you have to connect the solar panel to an external battery. The Spartan Camera battery box has the connections for a solar panel.

Solar panels are quickly growing in popularity, especially for Spartan cameras capable of direct solar connection. With the direct-connect capability of Spartan GoLive and GoLive 2 camera models, solar panels are a simple and quick plug-n-play power solution. ... Solar panels will keep your cameras running all day and switch over to external ...

If you have a Spartan Camera, "You Don't Have To Be There!" However, if you have a solar panel for your trail camera, then you won't have to be there!. All trail cameras require a battery supply to function and, depending ...

NOTE: This solar panel can only be connected directly to the Spartan Ghost or GoLive 4G trail camera model with Ghost adapter cable. To use the solar panel for older Spartan 4G trail cameras, a Spartan battery box and a lead acid battery (can be 6v or 12v) are needed. The solar panel can then charge the lead acid battery.

With the GoCams you have to have an external battery, you cannot direct connect a solar panel. The voltage will be too high and it will fry the camera. The panel on the GoCams also doesn't connect to the internal batteries so it doesn't charge them and there's no built in battery like the Ghosts and GoLives..

The W4 has an internal battery that is charged by a solar panel or solar panel/battery combination. The internal aa's are not charged by either. This is a 12 volt camera so you want your external setup to be 12 volts. The internal battery isn't huge so if you are expecting a lot of pictures per day you'll want the external battery as well.
