

Squirrel guard for solar panels

Used by 100's of professional installers, our animal and bird protection for solar panels is the best solution to protecting residential solar systems from squirrels and pigeons. Wire is pre-cut and then PVC coated to avoid any sharp edges. This will protect your hands from being cut as well as protect your roof from damage.

Go through the checklist before you install the Squirrel Guard on solar panel perfectly. Step 2 Assemble the two parts of the fastener. Insert the straight portion of the hook into the hole in the washer. The silver side of the washer should be inserted first. The silver side should face the J (bent) portion of the hook.

Solar panel squirrel guards are manufactured from extremely durable, high-quality materials designed to keep out critters of all shapes and sizes. Our solar PV experts will quickly determine the appropriate amount of wire screen necessary to wrap around the entire system and install the solar panel netting at your earliest convenience.

Solar Panel Bird Guard, 6in x 100ft Critter Guard, Solar Guard PVC Coated Mesh Roll Kit, Solar Panels Birds from Solar Screen with 70 Fastener Clips Rooftop Bird Screen Mesh for Squirrel Bird Critters 4.7 out of 5 stars 19

The squirrel guard is fastened to the frames of the panels and closes the gap between the roof and your solar panels. The PVC coated squirrel guard is very similar to a high gage chicken wire which will hold up to even the most persistent animals. These little critters may be cute, but they can cause big problems.

Get a 100 foot roll of 6 inch wire with 100 fasteners which are specially designed to attach our squirrel guard wire to your solar panels. Our PVC coated galvanized steel wire will resist corrosion while enhancing the appearance of your solar PV system. Wire is cut and then PVC coated to avoid any sharp edges.

Some solar installers install windguard material that attaches to the front and sides of the panels to give it a sleeker look. Oftentimes they sell this to the homeowner as a protection that replaces the need for a pigeon guard barrier, but they do not work as a bird deterrent.. If critters, squirrels or pigeons have at least a 2 inch gap, they can get under the windguard and have access to ...

Protect solar panels with SolarGuard bird screen wire mesh and clip system that prevents pest birds and animals from getting behind the solar panels. This no drill solution provides long lasting and discreet exclusion.
