Tesla powerwall 2 availability

It's time for the battle of the Powerwalls. The Tesla Powerwall 2 has been the most popular home battery on the market for years now. The release of the new Powerwall 3 battery means the Powerwall 2's reign of terror is coming to an end, but the Powerwall 2 hasn't become completely obsolete.

Today, my Powerwall 2 is showing as "unavailable" in the app and reporting 0% charge and not supporting the house load. I know this is untrue as it was at 43% yesterday and we are currently away and the house is using very little energy. Being away also means I can't perform any sort of...

Powerwall, in conjunction with a Backup Gateway 2, Backup Switch or Gateway 3, will power the home during a grid outage. When the system is installed with solar, Powerwall stores the excess solar energy produced to power the home when the sun isn't shining. Installation should only be performed by a Tesla Certified Installer.

The Powerwall - manufactured by Tesla in the USA - is lithium-ion based battery storage. Powerwall 1 came out in 2015, Powerwall 2 in 2020, and now the latest Powerwall 3 has been announced in the UK in 2024. Its main use case is to store surplus solar electricity for later use.

Most modern off-grid homes require at least 8 to 12kW of solar, depending on the location. However, in the case of the Powerwall 2, the charge rating is limited to a maximum of 5kW of solar (solar inverter size), so more than one Powerwall will be required for most applications - learn more about Tesla's off-grid requirements.
