

The efficiency rating of Tesla's solar panels and solar shingles is hard to come by, as Tesla does not release much data in this area. Tesla's solar panels tend to range between 19% and 20% efficiency, which means they convert about that percentage of the sun's energy into electricity.

Tesla used to offer only four sizes of solar arrays, but now offers quotes on systems as small as 4.8 and as large as 17.6 kilowatts, increasing in 0.4 kW increments. (That jump in size is the capacity of one solar panel, which often comes in a 400-watt size). Tesla promotes its panels' sleek, low-profile design.
