

The planets meaning

In astrology, planets have a meaning different from the astronomical understanding of what a planet is. Before the age of telescopes, the night sky was thought to consist of two similar components: fixed stars, which remained motionless in relation to each other, and moving objects/"wandering stars" (Ancient Greek: *asteres planetai*, romanized: *asteres planetai*), ...

The Solar System [d] is the gravitationally bound system of the Sun and the objects that orbit it. [11] It formed about 4.6 billion years ago when a dense region of a molecular cloud collapsed, forming the Sun and a protoplanetary disc. The Sun is a typical star that maintains a balanced equilibrium by the fusion of hydrogen into helium at its core, releasing this energy from its ...

This applies, in particular, to the designation "planets." The word "planet" originally described "wanderers" that were known only as moving lights in the sky. Recent discoveries lead us to create a new definition, which we can make using currently available scientific information.

The planets and points in astrology aren't just distant cosmic bodies. They're your personal energy architects, each bringing its own unique influence to your life. Think of them as the ultimate personality shapers, molding everything from your moods to your quirks and how you connect with others. Horoscopes; Astrology;

The gate numbers shown next to each planet in the Design line and the Personality line correspond to the colored definition on a Human Design chart. The red line on a body chart is known as the unconscious Design line or the body line, and represents the position of the planets 88 days prior to birth.

Don't forget that alignments from the first definition aren't always as striking as seen from the Earth. Even when all the planets gather within one quadrant in space, they may be scattered across the sky's dome. Moreover, when the inner planets are close to the Earth-Sun line, we won't see them in the night sky.

The body is there, thus, it counts.) Each planet symbolizes a different component of life, a different type of energy. In psychological terms, we can call them "needs" or "drives." Click on the astrology planets above to learn what each one brings to astrology.

The word planet comes from the Greek planitai (plan?tai) "wanderers". In antiquity, this word referred to the Sun, Moon, and five points of light visible to the naked eye that moved across the background of the stars--namely, Mercury, Venus, Mars, Jupiter, and Saturn.
