Question about Veritas Mk II - Irregular Micro Bevel; Veritas MK 2 Honing Guide Not Sharpening Square; Veritas MkII Power Sharpening System; Kreg Router Table Top and Jessem Mastr II Lift; Delta DJ-20 jointer from 1988

A 1:3-scale version of the Veritas sharpening system, it consists of a honing guide and an angle jig. The honing guide has a die-cast aluminum body that rides on a brass roller and accepts blades up to 3/4" wide; the stainless-steel clamping knob holds the blade against a pad in the guide.

The Veritas Mk.II power sharpening system lets you sharpen your hand tools quickly and repeatably. Keen edges can be achieved in a matter of minutes, and the system is so easy to use that excellent results are possible by someone who has little sharpening experience.

I'm debating between Work sharp and Veritas Mk.II Honing Guide System The MKII set includes narrow blade honing guide, standard blade holding guide, angle registration jig and camber roller for \$124. Pretty much all the accessories except the skew registration jig, which is separate. Or is it worth it to get the Work Sharp for \$189.

I recently purchased the Veritas MkII power sharpening system (henceforth the "PSS") from Lee Valley, after carefully considering all available technology (from ScarySharp to waterstones to Worksharp to Tormek etc.). After reading the instructions and trying it out, I was in heaven! Despite the considerable cost,

For one-third the price of the MkII, Stanley's Sharpening Kit/Honing Guide (Garrett Wade, 800-221-2942, garrettwade) presents a great value. The fastest-growing category of sharpening systems, these powered units use self-adhesive sandpaper stuck to swappable spinning platters.

Matt, I think that if you are basically happy with your existing sharpening system, but just need a quicker way to restore nicked edges, etc, Matej's suggestion of a x-coarse diamond stone is an excellent one.

FWW did a test of powered sharpening systems two or three years ago. Their picking this as the top choice and being able to produce a better edge than the other systems tested was my main incentive to buy the MK II Power Sharpening System. I ...

Veritas - Mk.II Sharpening System (Rating: 2) Overall, the Veritas MKII leaves something to be desired and is not worth the price. There are three main issues that I found with the system: 1. Not so big of an issue: The time sacrifice it ...

A while back I acquired an original Veritas Power Sharpening System. I haven't had the time to really look it over until now. This is the model that has both a horizontal platter and a vertical grinding wheel set side by side. I also believe there may have been a belt grinding attachment that could be purchased as an upgrade and fits in place of the grinding wheel.

If you sharpen frequently, or want to hone a variety of hand tools, the Veritas MkII Power Sharpening System (Lee Valley, 800-871-8158, leevalley) works with wider tools--2 5 / 8 " plane blades, for example. Finally, lovers of freehand sharpening will embrace LapSharp's LS-200 (707-473-0593, lapsharp).

I've had the Veritas Mk II sharpening system for a little less than a year. It has sharpened every flat-bladed tool in my shop at least once, and has sharpened my favorite tools many times. I love it. Quick and easy to use, quiet, and gives consistently excellent results.
