Inverters change the power produced by your solar panels into something you can actually use. Think of it as a currency exchange for your power. You might have a fistful of yen, but until you stop and exchange it for USD, you can't pay for lunch stateside. Your home is wired to conduct alternating current (AC) power.

Solar inverters convert the direct current (DC) energy from a solar panel into alternate current (AC) energy appliances use. It's also important to note that solar batteries store DC energy. Before you can use the energy in a battery to power an appliance, it has to be converted to AC energy using an inverter.
