renewables are eligible for Wisconsin's Renewable Energy Standard. Utilities (score 7.5 out of 20) o Investor-owned electric and natural gas utilities must spend 1.2% of annual gross operating revenues on renewable resource and energy efficiency programs. o They can also operate voluntary energy efficiency or renewable resource programs.

These energy sources will largely power the battery until the state's energy mix changes drastically. A goal of Wisconsin's Energy Dome, slated to be the first commercial-scale application of the technology, is to drive more renewable development, according to Alliant Energy, the utility that co-owns the Columbia coal plant.
